Professional Summary

Azure Data Engineer with **5.10+ years of experience** designing and implementing scalable, GDPR-compliant data solutions for global financial institutions including **ABN AMRO Bank (Netherlands)** and **TD Bank (USA)**. Expert in building robust ETL/ELT pipelines processing **1TB+ data daily** using Azure Data Factory, Databricks, and PySpark. Proven track record in cloud migration, data governance, and performance optimization. **Seeking opportunities in Europe with COS sponsorship** to contribute expertise in modern data engineering, lakehouse architectures, and cloud-native solutions.

Technical Skills

Cloud & Data Platforms: Azure Data Factory, Azure Databricks, Azure Synapse Analytics, Azure Data Lake (ADLS Gen2), Azure SQL Database, Blob Storage, Delta Lake, Snowflake, Microsoft Fabric

Programming & Processing: Python, PySpark, SQL, T-SQL

Data Engineering: ETL/ELT Pipelines, Data Modeling, Data Integration, SCD Type 2, Incremental/Full Loading, Medallion Architecture, Data Quality & Governance, GDPR Compliance

DevOps & Automation: Azure DevOps, CI/CD, Git, Jenkins, GitLab, Unit Testing, Logging Frameworks

BI & Visualization: Power BI, Data Warehousing, Star Schema

On-Premises: SQL Server Management Studio (SSMS)

Soft Skills: Agile/Scrum, Problem-Solving, Cross-functional Collaboration, Mentoring, Documentation

Professional Experience

PwC Acceleration Centers

December 2025 – Present

Senior Associate - Azure Data Engineer

Bengaluru, Karnataka, India

- Own end-to-end implementation of cloud data engineering solutions on Azure, from requirement analysis to production deployment and support for enterprise clients
- Design and build scalable data lakes, lakehouse architectures, and data warehouses using Azure Databricks, ADLS, and modern data engineering best practices
- Develop robust ETL/ELT data pipelines with PySpark, SQL, Snowflake, and Data Factory/Synapse to integrate structured and semi-structured data at scale
- Implement and optimize Databricks-based batch and near real-time data processing jobs, leveraging Delta Lake and performance tuning techniques for cost and speed optimization
- Apply modern data architecture patterns (medallion/lakehouse) to enable advanced analytics and BI use cases
- Implement data quality checks, lineage, and governance practices to ensure trusted, audit-ready data for business stakeholders
- Collaborate in an agile setup, using Git-based CI/CD (Azure DevOps/Jenkins/GitLab) to automate builds, testing, and deployment of data pipelines
- Mentor junior engineers through code reviews, knowledge sessions, and best-practice documentation to drive delivery excellence

Hexaware Technologies – Client: TD Bank (USA)

April 2025 – December 2025

Senior Data Engineer

Bengaluru, Karnataka, India

- Led cloud migration of multiple legacy databases to Azure SQL with minimal downtime, ensuring business continuity
- Built Python automation framework to execute SQL queries and deliver outputs in CSV format, reducing manual reporting by **40%**
- Designed comprehensive logging framework that improved root cause identification and reduced issue resolution time by **20%**
- Provided end-to-end production support (job monitoring, incident resolution, RCA), increasing pipeline uptime by **30%**
- Performed data profiling and quality checks to ensure compliance with enterprise data policies and standards
- Collaborated in Agile cross-functional teams, aligning engineering solutions with business priorities and stakeholder requirements

Tata Consultancy Services – Client: ABN AMRO Bank (Netherlands)

February 2020 – April 2025

Azure Data Engineer

Amsterdam, North Holland, Netherlands

- Designed and optimized ADF pipelines processing **2,000+ files daily** using scheduled triggers with SCD Type 2 implementation for accurate historical data tracking
- Developed **GDPR-compliant** data ingestion pipelines managing **1TB+ data daily** with data masking, encryption, and governance controls for European regulatory compliance

- Accelerated data processing by **35%** using Azure Databricks and PySpark for large-scale transformations on structured and semi-structured datasets
- Created metadata-driven ADF Dataflows handling structured, semi-structured, and unstructured data with dynamic parameterization
- Conducted code reviews and mentoring sessions, ensuring adherence to reference architecture, naming conventions, and best practices
- Enhanced pipeline monitoring and debugging processes using custom logging frameworks, reducing downtime incidents and improving reliability
- Collaborated with European stakeholders across Netherlands headquarters, ensuring data solutions met regional compliance and business requirements

Certifications

Databricks Certified Data Engineer Professional — Databricks
Databricks Certified Data Engineer Associate — Databricks
Microsoft Azure Fundamentals (AZ-900) — In Progress
Microsoft Fabric Data Engineer (DP-700) — In Progress
Academy Accreditation - Generative AI Fundamentals — Databricks
Academy Accreditation - AI Agent Fundamentals — Databricks
Business Analytics with Excel — LinkedIn Learning
Snowflake Hands-on Essentials — Snowflake

GitHub Projects & Technical Contributions

Azure Data Pipeline Automation Framework <i>Python, Azure, PySpark</i> • Developed reusable Python framework for automated SQL query execution and CSV output generation • Implemented metadata-driven pipeline orchestration reducing development time by 50%	<u>GitHub</u>
GDPR Compliance Data Masking Solution <i>PySpark, Databricks, ADF</i> • Built enterprise-grade data masking framework for PII data in banking domain • Achieved 100% GDPR compliance with audit logging and data lineage tracking	<u>GitHub</u>
Delta Lake Performance Optimization <i>Databricks, Delta Lake, PySpark</i> • Optimized Delta Lake tables with Z-ordering and data partitioning strategies • Reduced query execution time by 40% for analytical workloads processing TB-scale data	<u>GitHub</u>

Education

Jain (Deemed-to-be) University <i>Master of Business Administration (MBA) in Data Science – CGPA: 8.69/10</i>	Bengaluru, Karnataka, India <i>June 2022 – July 2024</i>
Seshadripuram Degree College <i>Bachelor of Computer Application (BCA) – CGPA: 7.43/10</i>	Bengaluru, Karnataka, India <i>2016 – 2019</i>

Additional Information

Languages: English (Professional Working), Kannada (Native), Tamil, Telugu, Hindi, Malayalam
Visa Status: Indian Citizen – **Seeking COS Sponsorship for Europe (UK/Netherlands/Germany)**
Work Authorization: Open to relocation within Europe – Experience working remotely with European teams
Previous European Experience: 5+ years working directly with ABN AMRO Bank (Netherlands) stakeholders
Availability: Immediate (Notice Period: Negotiable)
